

Christopher Johnston graduated with a Masters in Pharmacy (1st class honours) in 2011. His Pre-Registration training was completed with Medicare Pharmacy group and he subsequently registered as a pharmacist in 2012. Following a MSc in Process Engineering, he commenced a PhD in Molecular Therapeutics in September 2013, under the supervision of Dr Marie Migaud and Prof Christopher Hardacre. His research involves the synthesis of novel therapeutic compounds by means of ionic liquid and phosphorous chemistry, and involves interdisciplinary work with the School of Chemistry and Chemical Engineering.
