

Munther obtained his MSc degree in pharmacy from the University of Jordan in 2004. After this he moved on to work as a specialist hospital pharmacist within the leading educational hospitals (affiliated with Johns Hopkins Medicine, USA) throughout the UAE and KSA. He joined the School of Pharmacy, Queen's University Belfast in 2012, where he began his PhD studies under the supervision of Professor James McElroy and Professor Michael Scott (as a member of Clinical and Pharmacy Practice Research Group). His research work is focused on the challenging and important area of safe and effective use of antibiotics (including work on antimicrobial resistance/infection control and prevention measures). The latter is a national and indeed a global challenge within both primary and secondary healthcare settings. Munther is a member of Jordan Pharmaceutical Association, Jordan. In addition, he is registered as a hospital pharmacist within the Health Authority of Abu Dhabi, United Arab Emirates.
