

Susan Pierce obtained a BSc in Chemistry from University College Cork in 2011 and an MSc in Chemical Biology from QUB in 2012. She has been working towards a PhD in the School of Pharmacy since October 2012 under the supervision of Dr Marie Migaud and Dr Helen McCarthy. The primary focus of her research is the synthesis of NAD<sup>+</sup> and ADPR analogues for use in biological investigation. While completing her PhD, she has taken part in the Green Impact initiative in the John King Laboratory, with the lab achieving a bronze award in 2013 and gold in 2014.
